Project Management and Construction Management Services for Transit Facilities Projects

As the PM/CM for OCTA's transit facilities projects, Hout Construction Services, Inc. is responsible for managing the projects at five bus maintenance and operations bases (bus bases), five transportation centers, and two park-and-ride facilities. The individual construction projects for each facility varies in the range of \$100,000-\$2 million each. OCTA has identified over twenty (20) individual projects to be completed by 2021.

The Hout Construction Services team responsibilities include full project management/construction management services, agency coordination, document control, construction planning, project controls and construction oversight.
